

A special meeting in honour of **Giuseppe Marchesini**, on the occasion of his 70th birthday, will take place on **May 29, 2012**, at the **Palazzone of the Scuola Normale Superiore di Pisa in Cortona**, Italy. Talks and discussions will cover topics and recent developments in areas of high energy physics, both theory and phenomenology, which are close to recent or past Pino's activity.

The program will include talks by **Al Mueller** (Columbia), **Yuri Dokshitzer** (Paris VI), **Gabriele Veneziano** (Collège de France, CERN), **Bryan Webber** (Cambridge). A detailed schedule of the meeting will be distributed later.

Those who would like to attend the meeting should send a mail message to

marisa.bonini@unipr.it

specifying whether they intend to contribute a short (10') or an extended (20') talk. Deadline for submitting the proposals is April 15.

The meeting will be in the same location as the traditional Cortona meeting of Theoretical Physics, starting on May 30th. Information about Hotels in Cortona and how to reach Cortona can be found on the Conference web site <http://www.pr.infn.it/Cortona2012/>.

Looking forward meeting many former students, collaborators and friends of Pino,

A. Bassetto¹, M. Bonini², S. Catani³, G. Cicuta⁴, C. Destri⁵, E. Onofri⁶
