AXISYMMETRIC SIMULATIONS

- A. M. Abrahams and C. R. Evans “Critical Behavior and Scaling in Vacuum Axisymmetric Gravitational Collapse” *Phys. Rev. Lett.* **70** 2980 (1993). This is fully constrained evolution. item “Gravitational-Wave Emission from Rotating Gravitational Collapse” Richard F. Stark and Tsvi Piran *Phys. Rev. Lett.* **55** 891 (1985). In this work, only the Hamiltonian constraint ($G_{00} = \dots$) is solved.
- A. M. Abrahams, G. B. Cook, S. L. Shapiro, S. A. Teukolsky, “Solving Einstein’s equations for rotating spacetimes: Evolution of relativistic star clusters” *Phys. Rev.* **D49** 5153 (1994). This is fully constrained evolution.
- A. A. Abrahams and C. R. Evans “Trapping a geon: Black hole formation by an imploding gravitational wave” *Phys. Rev.* **D46** R4117 (1992). In this case the Hamiltonian constraint ($G_{00} = \dots$) is solved, but the momentum constraints ($G_{0i} = \dots$) are not.
- C. R. Evans, “Calculating Axisymmetric Gravitational Collapse” in *Dynamical Spacetimes and Numerical Relativity*, edited by Joan Centrella (Cambridge University Press, Cambridge, 1986). In this reference, the full constraints ($G_{0\alpha}$) are solved.
- “Enforcing the Momentum Constraints During Axisymmetric Spacelike Simulations”, C. R. Evans in *Frontiers in Numerical Relativity* C. R. Evans, L. S. Finn, and D. W. Hobill, editors. (Cambridge University Press, Cambridge, 1989). In this reference the full equations ($G_{0\alpha}$) are solved.
- E. Hirschmann, S. Liebling, F. Pretorius and M. Choptuik, in preparation (2002).
- F. Pretorius, “Numerical Simulations of Gravitational Collapse”, PhD dissertation, University of British Columbia (in preparation, 2002). Pretorius employs a fully constrained axisymmetric approach.

CHARACTERISTIC METHODS

- The Binary Black Hole Grand Challenge Alliance: R. Gomez, L. Lehner, R. Marsa, J. Winicour, A. Abrahams, A. Anderson, P. Anninos, T. Baumgarte, N. Bishop, S. Brandt, J. Browne, K. Camarda, M. Choptuik, R. Correl, G. Cook, C. Evans, L. Finn, G. Fox, G. T. Haupt, M. Huq, L. Kidder, S. Klasky, P. Laguna, W. Landry, J. Lenaghan, J. Masso, Richard A. Matzner, S Mitra, P. Papadopoulos, M. Parashar, L. Rezzolla, M. Rupright, F. Saied, P. Saylor, M. Scheel, E. Seidel, S. Shapiro, Deidre Shoemaker, L. Smarr, B.

Szilagyi, S. A. Teukolsky, M.H.P.M. van Putten, P. Walker and J. W. York, “Stable characteristic evolution of generic 3-dimensional single-black-hole spacetimes” *Phys. Rev. Lett.* **80** 3915-3918 (1998).

- B. Szilagyi, R. Gomez, N. Bishop and J. Winicour *Phys. Rev.* **D62**, 104006 (2000).

HYPERBOLIC METHODS
